

Learning Process

I joined the Medical research club, and I'm proud to say that I even served as its president! In the club, we studied various topics related to healthcare, including but not limited to CPR, psychology, and my favorite—anatomy.

Being the club president was also my first experience leading a team. Through working with other club officers, I learned the importance of teamwork and how to manage chaotic situations when necessary.

Study Plan

Short term goal:

- *Toeic 800*
- *Obtain a car & motorcycle driver's license*

Mid term goal:

- *Obtain relevant professional certification*
- *Toeic golden certification*

Long term goal:

- *Undertake an internship at a relevant agency*

Personal Profolio

I am REX

R*ational mindset*

E*nlightened perspective*

Family Background & Autobiography

MY father works in electronic technology field, and my mother work as a teacher of kindergarten, due to the characteristics of her profession, which is good at dealing with naughty kids, I was brought up to be a well-bahaved child from a young age.

Both of my parents used a democratic and liberal approach to education while i was growing up, which left a broad space for me to develop my hobbies and find out what i want to become in my future.;

Personality

<i>strengths</i> 1. <i>Self-discipline</i> 2. <i>Hard work</i> 3. <i>Fast-learning</i>	<i>opportunities</i> 1. <i>Good learning environment</i> 2. <i>Good teacher</i>
<i>weakness</i> <i>Math ability</i>	<i>threats</i> <i>Too silent sometimes</i>

<i>Use</i> 1. <i>Do everything well</i> 2. <i>Never give up</i>	<i>Exploit</i> <i>Acquire professional knowledge</i>
<i>Stop</i> <i>Express opinions more often</i>	<i>Defend</i> <i>Plan my own activities</i>

Motivation of Application

My parents gave me plenty of space to explore my interests, and I first discovered my passion for medicine in high school.

As the saying goes, "A man becomes a good doctor after suffering three broken arms." Throughout my athletic activities, I have experienced various injuries, ranging from minor cuts and bruises to fractures. My visits to the hospital sparked a deep interest in medicine, and I aspired to be like doctors who use their expertise to help patients. This is why I want to learn more about how to help those who in need with my medical knowledges.
